

RAVI KUMAR. A

QA ENGINEER | AI/LLM TESTING | API | WEB & MOBILE AUTOMATION | PERFORMANCE TESTING

Chennai, India | +91-7904276206 | ravikumar9361@gmail.com
linkedin.com/in/ravi-k-937ab3263 | github.com/ravikumar0508

PROFESSIONAL SUMMARY

QA Automation Engineer / QA Lead with 7+ years of experience across web, API and mobile testing. Strong hands-on experience in Python, Java, Robot Framework, Selenium WebDriver, Playwright, Appium, REST Assured, Postman, Swagger, SQL, Jenkins, Git and JMeter. Experienced in AI/LLM quality engineering including AI-powered classification, recommendation, NLP, resume parsing and sentiment-analysis workflows. Skilled in AI-output validation, functional/API/integration/E2E automation, regression, performance testing, defect investigation, root-cause analysis and release quality.

AI / AUTOMATION SKILLS

AI/LLM Testing	AI/LLM application testing, prompt/response validation, classification testing, NLP validation, recommendation testing, sentiment analysis, AI-output regression, accuracy/consistency validation
AI-Assisted QA	Generative-AI/LLM assistants for test-case ideation, automation code assistance, debugging, log analysis and QA documentation
Automation	Selenium, Playwright, Appium, Robot Framework, Cucumber, REST Assured
API / Data	Postman, Swagger, REST APIs, SQL, PostgreSQL, MySQL, MongoDB
Performance / DevOps	JMeter, Jenkins, CI/CD, Git, GitHub
Testing	Manual, Functional, Regression, Integration, E2E, Smoke, UAT, Test Strategy, Test Planning, Defect Triage, RCA
Methodologies	Agile, Scrum, Kanban, BDD/TDD Concepts

PROFESSIONAL EXPERIENCE

DT Skill AI, Chennai | September 2024 - Present

QA Lead

Project: Spira Power – AI-Powered Email Classification & Automated Quotation System

- Defined QA strategy and coverage for AI-driven email classification, quotation, certificate and monitoring workflows.
- Built and maintained Python/Robot Framework automation with Selenium and Playwright for functional, regression and E2E scenarios.
- Performed REST API automation/testing using REST Assured, Postman and Swagger; validated service responses and backend data.
- Validated AI processing across email ingestion, classification and quotation workflows for accuracy, consistency, business-rule compliance and edge cases.
- Investigated automation and AI/product failures using structured troubleshooting, log analysis and root-cause analysis.
- Integrated regression automation with Jenkins/CI/CD and enhanced reusable framework utilities.
- Achievement: Expanded repeatable automated coverage across critical AI and application workflows and improved release validation.
- Achievement: Combined API, data, functional and AI-output validation into end-to-end quality scenarios.
- Mentored junior QA engineers and collaborated with product/engineering teams in Agile/Scrum.

Smitch, Coimbatore | March 2023 - August 2024

Sr. QA Engineer

- Designed test plans, cases and automation strategies for functional, regression, integration and system testing.
- Developed web automation using Python, Robot Framework, Selenium and Playwright; performed mobile automation using Appium.
- Built API automation using REST Assured/Postman and validated backend workflows with PostgreSQL.
- Performed performance/load testing with JMeter and investigated failures using root-cause analysis.
- Integrated automated execution with Jenkins and mentored junior QA engineers.
- Achievement: Improved automation coverage by 40%, reducing manual regression effort and increasing release confidence.
- AI/Quality Focus: Applied AI-assisted QA techniques for test expansion, automation maintenance and failure-analysis support.

Contus Tech, Chennai | June 2022 - March 2023

QA Engineer

- Executed manual, functional, regression, smoke and UAT testing for web and mobile applications.
- Developed UI automation using Selenium, Playwright, Python/Java and Cucumber.
- Performed API/integration testing using REST Assured and Postman.
- Investigated defects, analyzed failures and validated fixes with developers.
- Achievement: Expanded reusable UI/API automation coverage to reduce repetitive manual validation and improve release feedback.
- AI/Quality Focus: Used AI-assisted test-design techniques for scenario ideation, edge-case identification and automation troubleshooting.

EIT Professionals India Pvt Ltd, Chennai | December 2021 - May 2022

QA Engineer

Project: HRMS & AI-Driven Recruitment Platform

- Designed and executed functional, integration, regression and system testing for an enterprise HRMS platform.
- Developed Python/Robot Framework automation and validated REST APIs between web, mobile and AI components.
- Performed database validation using MySQL and MongoDB.
- Tested recommendation, resume parsing and sentiment-analysis modules and investigated data-processing issues.
- Performed high-volume processing and performance validation.
- Achievement: Reduced manual verification effort by 60% and improved resume parser accuracy to 90%+.
- AI Testing Focus: Validated recommendation relevance, resume parsing accuracy, NLP/sentiment outputs and AI data-processing scenarios using positive, negative and edge-case inputs.

GI Consultants, Bangalore | May 2020 - May 2021

QA Engineer

Project: Food Booking & Delivery Application

- Executed end-to-end QA across customer, restaurant, delivery and admin web/mobile workflows.
- Built regression/smoke automation using Robot Framework, Python, Selenium and Appium.
- Performed functional, UI, API, integration and E2E testing; validated REST APIs using Postman and REST Assured.
- Validated synchronization between mobile/web applications and backend services and integrated automation with CI/CD.
- Achievement: Reduced manual testing effort by 50% through automation and repeatable regression execution.
- AI/Quality Focus: Applied AI-assisted test-design techniques to expand negative, boundary and regression scenarios.

Watermelon Consulting Services, Bangalore | May 2019 - May 2020

QA Engineer

Project: Client Issue Management – Ticketing System

- Designed and executed functional, regression and integration test cases for ticket workflows.
- Performed browser-based E2E testing and REST API testing using Postman and REST Assured.
- Built automated regression suites using Robot Framework and Python.
- Investigated defects and collaborated with developers to validate fixes.
- Achievement: Reduced manual regression effort by 40% through automation.
- AI/Quality Focus: Used AI-assisted techniques for test-case brainstorming, defect-analysis support and repetitive QA documentation.

EDUCATION

Bachelor of Automobile Engineering | SACS MAVMM Engineering College, Madurai, Tamil Nadu | 2016
